

Xm radio is invaluable for giving me choices to suit changing moods on long trips and exactly what I want locally; I also want to know weather at destinations on trips, which is never given by local stations. The minimal commercials is greatly appreciated. News choices at any time is very much appreciated.

Please DO NOT mess with my XM - At least not until you have driven through 3 states at night with only honky tonk to hear.-And I like honky tonk- in small doses. I oppose HR4026
